

arcserve®

Protect what's priceless.

# THE WORLD'S MOST EXPERIENCED PROVIDER OF DATA PROTECTION AND DISASTER RECOVERY SOLUTIONS

## INNOVATION PROVEN IN DECADES

Established in 1983, Arcserve has redefined the way companies protect their data, bringing decades of innovation and countless hours of iteration to the solutions they rely on to keep their businesses running smoothly.

## HELPING BUSINESSES PROTECT WHAT'S PRICELESS

Arcserve's roots in innovation run deep, going far beyond backup-as-usual to protect the time, money and productivity of users by removing the cost and complexity of modern IT.

# ARCSERVE'S BUSINESS IS PROTECTING YOURS

Your business needs a partner that never lets down its guard, which is why Arcserve's first item of business is always protecting yours.

## MINIMIZE DOWNTIME AND PREVENT DATA LOSS FROM ALL IT PLATFORMS

Preserve business operations with battle-tested technologies that restore access to critical data, systems and applications with support for every policy, RTO, RPO, and (SLA).

## CUT DATA PROTECTION COSTS BY UP TO 50%

Arcserve's value-enabled model of application and data protection reduces TCO by unifying all business continuity efforts across your entire organization. Eliminate the growing patchwork of bolted-together products while delivering on every SLA at a fraction of the cost.

## INCREASE STAKEHOLDER TRANSPARENCY

Modern IT is all about service delivery, which is why Arcserve arms you with Assured Recovery™ capabilities to easily restore and deliver on SLAs. Built-in, fully-automated disaster recovery testing is easily deployed without business downtime or impact to production systems.

## PROTECT FROM CYBER-ATTACKS & RANSOMWARE

Eradicate the impact of malicious attacks with continuous third-party vulnerability scans, SSL encryption, and other technical controls. Go back in time to multiple recovery points and restore error-free – no ransom required.

## MANAGE & PROTECT CLOUD WORKLOADS

Robust, cloud-native technologies protect your IT transformation with multi-cloud and cross-cloud data protection that allows you to scale up and down on-demand. Private or public cloud, your data and systems remain secure and always available.

## MANAGE LEGAL COMPLIANCE RISK

Alleviate data safety concerns with compliance-driven technology specifically designed to address GDPR, among other regulations, and cloud data centers located in some of the most impenetrable facilities in the world.

## REDUCE IT COMPLEXITY BY UP TO 50%

From UNIX and x86 to private and public clouds, protect your entire data ecosphere with a single solution and heterogeneous protection, whether deployed with software, appliances, or public and private clouds.

# MEET ARCSERVE'S BUSINESS CONTINUITY CLOUD

**The only solution to meet your RTOs, RPOs, and SLAs without the complexity of multiple tools, vendors and interfaces.**

Cloud is rapidly changing the way businesses back up data, yet most continue to use non-x86 platforms such as UNIX, HP/UX, and AIX to support legacy applications.

Arcserve untangles the knot of 21st Century IT by combining powerful backup, disaster recovery, high availability, and email archiving technologies for a complete solution that eliminates downtime and data loss in any location, from your applications and systems, at your premises and in your clouds.

## Protect Every Single Byte

Powered by a cloud-based management interface, you get one solution to fully protect your entire IT ecosystem:

- **Prevent downtime** with the only integrated cloud-native, cloud-based, and cloud-ready solution
- **Restore SLAs** and support RTOs and RPOs from seconds to hours
- **Automatically test** and validate recoverability with granular reporting
- **Immediately restore** access to critical systems and applications
- **Safely move** large volumes of data to and from the cloud without draining bandwidth
- **Easily scale** and pay-as-you-grow without adding more tools or management interfaces

## WHY TRUST ANYONE ELSE?

Arcserve's teams are among the most experienced in the data protection industry, dedicated to making the lives of IT teams easier and delivering the most comprehensive technologies with a consumer-grade user experience.

## AVAILABLE EVERYWHERE

Arcserve is headquartered in Minneapolis with offices around the world.

## TRUSTED BY THE FORTUNE 5 MILLION

Leading global companies like Expedia, Bloomberg, Thomson Reuters and Sony Music rely on Arcserve for infrastructure resiliency, as do countless mid-sized and smaller organizations in need of highly intuitive, value-driven data protection solutions.
